

Raghav Verma

New Delhi, India | raghav.verma.work@gmail.com | GitHub | Portfolio | LinkedIn

Summary

Frontend engineer focused on high-performance React applications, real-time visualization systems, and scalable frontend architectures. Experience integrating computer vision outputs into browser interfaces, consuming REST and WebSocket APIs, and working across the full product stack from UI to data layer.

Technical Skills

- **Languages:** TypeScript, JavaScript (ES6+), Python, SQL
- **Frontend:** React 18, Next.js, Vite, Tailwind CSS, shadcn/ui
- **Visualization:** Canvas API, WebSockets, real-time video overlays, motion analysis
- **3D / Graphics:** Three.js, React Three Fiber, Drei, WebGL
- **Animations:** GSAP, Framer Motion
- **Backend:** Node.js, REST APIs, PostgreSQL, Prisma
- **Tools:** Git, Docker, Postman, Jest, Vitest

Professional Experience

SDE Intern — Khel.AI

2026 – Present

- Building frontend interfaces for a sports analytics platform that integrates computer vision with real-time video analysis.
- Developing Canvas-based rendering pipelines and browser-side motion analytics tooling.
- Architecting modular React component systems and 3D visualization layers.

Frontend Engineer (Contract) — Hypeliv Solutions Pvt. Ltd

Aug 2025 – Jan 2026

- Optimized Next.js trading platform reducing LCP from 2.5s to 1.5s through dynamic imports and code splitting.
- Built Markets and Wallet features with WebSocket data streams and schema validation.
- Refactored React components reducing unnecessary re-renders by 30%.

Frontend Engineer Intern — The TechnoLabs

Jan 2024 – Jul 2024

- Built invoice generation system using React and jsPDF with validation and PDF export.
- Integrated REST APIs for invoice submission and retrieval.
- Developed Python scripts for OCR dataset validation processing 500+ documents.

Open Source Projects

DevTrackr — TypeScript SDK for GitHub API

- Built TypeScript SDK wrapping GitHub REST API with typed pagination and rate-limit detection.
- Published to npm with tree-shaking, ESM/CommonJS compatibility, and zero runtime dependencies.

Boundary — API Integration Middleware

- Middleware pipeline handling retries, timeouts, and structured logging for third-party APIs.
- Achieved 100% test coverage using Vitest.

Education

Master of Computer Applications

2024 – 2026 Vivekananda Institute of Professional Studies, GGSIPU

Bachelor of Computer Applications

2021 – 2024 Bennett University
